Dear Parents

High impact tips for GCSE Science revision

After careful consideration and analysis of mock exams the middle leaders in the Science Faculty have put together a small number of ways that you can support your child to make big gains in their GCSE Science exams in the summer.

We will shortly be emailing out some very high quality resources to all the Year 11 students to support their revision and implementation of our tips below:

Biology, Chemistry and Physics Tips (Including Combined Science)

- Complete all the *required practical* revision sheets and learn this material.
- Work through the exam questions that have been shared on google drive, marking them with the appropriate mark scheme. Seek your teacher's help when stuck.

Physics Only Tips

- Learn all physics equations using the equation revision cards (equations are no longer supplied in Physics exams).

Please remember, we believe that if your child follows the advice above then this should significantly improve their chances in the summer, but they should also be doing other forms of revision, for example mind maps, use of workbooks or revision guides.

If you would like any more information about this or any revision guide ISBN numbers, please do not hesitate to contact me on my email: p.gomersal@tgsch.uk

Yours sincerely

Mr P Gomersal
Faculty Leader: Science
