Dear Parents

Mathematics Virtual Learning Environment – Parent Portal

Your child will soon sit their first Mathematics assessment following almost a term of work. In order to prepare for that assessment, students are encouraged to access the Mathematics VLE to find links to support their revision. In order for parents to help support good revision and preparation we have a VLE portal page dedicated to parents. Your child's Maths teacher will guide them through this process.

The Portal contains useful information about how our Maths curriculum, long term plans and schemes of learning are structured as well as key dates throughout the year. It also showcases some exemplar student work relating to responding to teacher feedback.

The best way to navigate to the Parent Portal is via the school website, using the blue VLE icon, then into the Maths main course page and onto the Portal. Alternatively, you will find reach it directly using the following link:

<https://vle.tadcaster.n-yorks.sch.uk/moodle2/course/view.php?id=480>

Once onto the Portal you will find details of everything outlined above along with links to sections of the VLE frequently used by students for distributed learning homework and to other useful websites. Some VLE links do require student login details to proceed from the Parent Portal.

I hope you find it very useful as a tool to support your child's Maths learning and progression. If you have any queries please contact me at school on r.power@tgs.starmat.uk

Yours sincerely

R Power
